

Sound and Backline stage instructions

the band QUEENIE <http://www.queenie.cz>

This Rider will inform you about the stage situation and conditions of the band with rented instruments. PA system is provided by a promoter. Queenie uses fully own sound monitor system called MyMix into which are some instruments splitted (see the page 3 - Input list / 5th column - all IN/OUT are XLR). The monitor mixing desk is not needed. Own sound engineer is part of the team. **Please let him know your PA setup, especially the specification of the mixing desk.**

According to the scheme you need to prepare and provide (it must be prepared before the band arrives):

- a high quality PA which can produce a sound pressure from 115 dB without any distortion over

- the stage at least 8×6 m (30×20 ft) and bigger (smaller after prior agreement), the entrance to the stage must be solved from the rear and/or the sides of the stage
- we prefer the PA not to stand on the stage; the band must have full access to PA without restrictions
- at the entrance of the stage there must be a covered and illuminated backstage for costumes and props (covered against a weather and the spectators' eyes)
- the stage must be clean, dry and properly weather resistant (based on generally accepted standards), illuminated during assembling and disassembling
- the presence of an light engineer with programmable lights consisting of modern intelligent lights, etc; not just so-called "party lights"
- using of fog / haze according to the agreement with the band on the place, we prefer MDG ATMe Atmosphere; poor foggers and mixtures are forbidden
- as mixing desk we prefer Yamaha or Midas with at least 32 inputs - placed in two-thirds of the auditorium from the stage and on its axis (not under the balcony)
- 4x returns (AUX - XLR) to connect to our monitor system - talkback ready; we are using wireless in-ear system with **frequency range 734 - 776 MHz**
- 2 pcs of monitor with the EQ settings (at least LOW cut) for the guitar player, in case of passive monitor the basic „knobs on it” is OK
- 3×2×0,6 m (10×6,5×2 ft) NIVTEC drum riser, 2×2×0,2 m (6,5×6,5×0,7 ft) NIVTEC keyboard riser; or 2×2×0,6 m / 1×2×0,2 m in case of smaller stage
- 7x big boom stand with 6x 58 clip; 3x guitar amp microphone holder (width 26,5 cm / 0,9 ft) or 3x round base stand
- power supply European 230 AC power - CEE 7/4 plug (Schuko) – see the scheme on the next page
- sufficient quantity of a XLR cables of different lengths for common connection and connection to SPLITTER - approx 50 pcs
the best is 12 channel multicore for connection between SPLITTER and STAGE BOX
- your STAGE BOX must be placed close to our SPLITTER beside the drums (see the next page)
- the constant presence of the sober person responsible for the technical team, PA and equipment
- on the stage must be maintained a constant temperature above 17°C; if a show is in a closed area, non-smoking rooms must be provided
- in all areas (on the stage, in the backstage, etc.), where the band is moving before/during/after the sound check and the concert, it is forbidden to smoke

If a point cannot be met or you have an another alternative, please always contact the band's sound engineer for consultation. The contact is below.

During the sound check, after the sound check, before and after the concert, without the prior consent of the band, it is forbidden to use and manipulate with already prepared instruments, microphone stands and equipment!!!

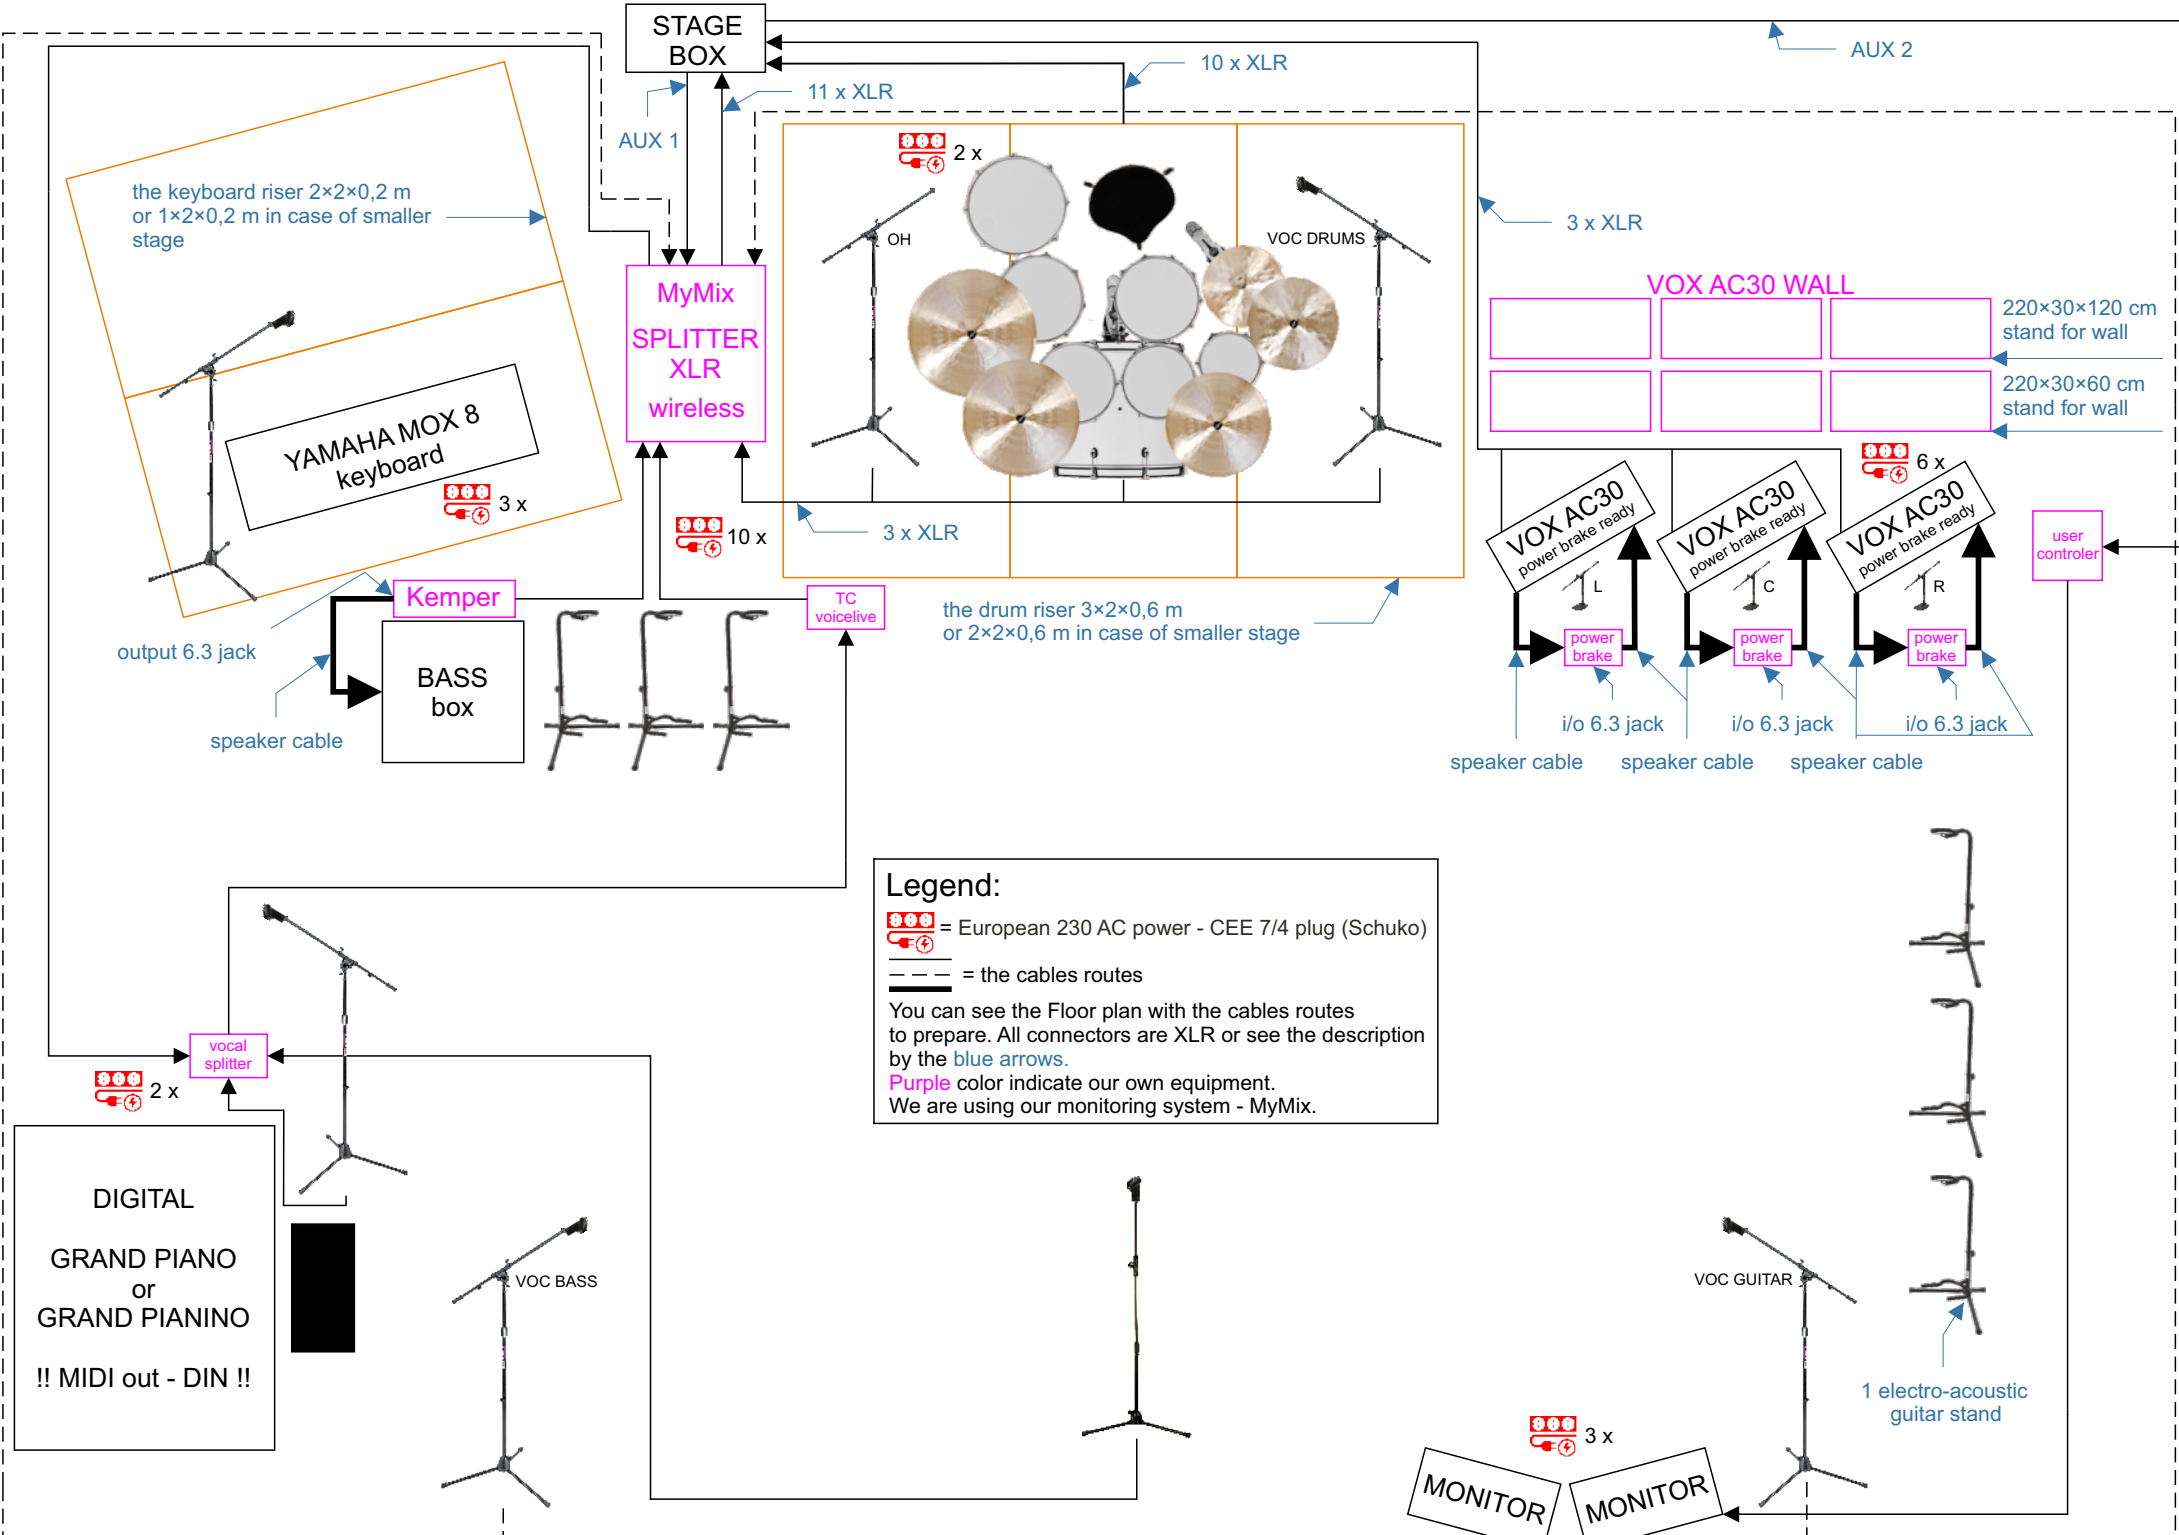

Please note that only the band and the tech team have the right to be on the stage during the concert. Announcer (or the other „speaker”) can enter the stage only according to a pre-agreed scenario or after the end of the performance - that is, after the song "We Are The Champions" and when the band left the stage.

Promoter's initials:

Legend:

= European 230 AC power - CEE 7/4 plug (Schuko)

= the cables routes

You can see the Floor plan with the cables routes to prepare. All connectors are XLR or see the description by the blue arrows.

Purple color indicate our own equipment.

We are using our monitoring system - MyMix.

Input list

channel	input	mic / DI	description	connection
1	KICK	Beta 52	own holder (no stand)	DIRECT

QUEENIE – Backline

Please note that we need exactly mentioned instruments. Still, if a point cannot be met or you have an another alternative, please **always contact** the band's sound engineer for consultation. All instruments must be fully functional and in perfect condition. The contact is below. Thank you.

the main guitar:

YES	NO
-----	----

- 3x VOX AC30 **with the FX loop** (all amps must be the same) and **power brake ready** must be the same visually and in the similar condition

YES	NO
-----	----

- 1x Red Special guitar (with the new roundwound strings 0.09 – 0.46)
https://en.wikipedia.org/wiki/Red_Special

YES	NO
-----	----

- 3x the electric guitar stand

YES	NO
-----	----

- 1x the electro-acoustic guitar

YES	NO
-----	----

- 1x the electro-acoustic guitar stand

YES	NO
-----	----

- 1x Fender Telecaster (optimally cream or the arctic white color)

the bass guitar:

YES	NO
-----	----

- 1x Fender Precision Bass 4 string (with rosewood fretboard and new roundwound strings 0.45 – 1.05)

YES	NO
-----	----

- 1x bass cabinet 4×10" or 2×12" (best Markbass, Ampeg) at least 300 W

YES	NO
-----	----

- 1x speaker cable compatible with the bass cabinet and with 6.3mm jack on the amplifier side

YES	NO
-----	----

- 1x bass guitar stand

YES	NO
-----	----

- 1x spare bass guitar amplifier (best Markbass, Ampeg, TC Electronics) at least 300W

the drums:

YES	NO
-----	----

- Drum set: 3x rack toms (10", 12", 13"-14"), 2x floor toms (16", 18"), bass drum 22"×18" **maple** must be the same color (prefer silver or black) and the same series

YES	NO
-----	----

- 1x snare drum 14"×min5.5" **maple**

YES	NO
-----	----

- Cymbals: 3x crash – 16", 17", 18", 1x ride – 20"-23", 1x hi-hat – 14", 1x china – 16"-18" must be the higher class from the same brand

YES	NO
-----	----

- Hardware: 5x stand for cymbals (all must be booms), hi-hat stand (prefer dw5000), snare drum stand, drum throne, single pedal (prefer dw5000)

YES	NO
-----	----

- Drumheads: toms – clear, snare – coated, bass drum – resonant white or black

YES	NO
-----	----

- 1x tambourine

the keyboards:

YES	NO
-----	----

- Synthesizer Yamaha MOX 8 or Yamaha MOXF 8

<http://www.musicradar.com/reviews/tech/yamaha-mox-8-474698>

YES	NO
-----	----

- Sustain pedal for MOX or sustain pedal with switchable polarity

e. g. https://www.thomann.de/es/lead_foot_lfd2.htm?ref=prod_rel_265103_1

YES	NO
-----	----

- Keyboard stand with boom arm

e. g. https://www.thomann.de/es/millennium_ks3000_b.htm#

https://www.thomann.de/es/ultimate_ax_48_pro_b_plus.htm

https://www.thomann.de/es/adam_hall_sks22_mb_mikrofonarm.htm?ref=prod_rel_265103_0

If no, then at least keyboard stand "double X shaped"

YES	NO
-----	----

- Digital grand piano or pianino (important output: MIDI out – DIN) with the piano bench

e. g. https://www.thomann.de/gb/yamaha_clp_565_gp.htm
